PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on experience in Python, SQL, machine learning, predictive modeling, and data visualization. Proficient in data preprocessing, EDA, feature engineering, model development, and evaluation using Pandas, NumPy, Scikit-learn, TensorFlow/Keras, and Streamlit. Experienced in building end-to-end data science projects including sales forecasting, and fraud detection, with a strong foundation in transforming data into actionable business insights.

TECHNICAL SKILLS

Programming: Python, SQL, Java, JavaScript (ES6+)
Data Analysis: Pandas, NumPy, Data Cleaning, EDA, Data Preprocessing, Feature Engineering, Statistical Analysis, Jupyter Notebook
Data Visualization: Matplotlib, Seaborn, Plotly
Machine Learning: Scikit-learn, Regression, Classification, Clustering, Feature Engineering, Model Evaluation
Deep Learning: TensorFlow, Keras, Streamlit, LSTM
Forecasting: Time-Series Analysis, LSTM Forecasting, MAPE, RMSE
Databases: MySQL, PostgreSQL, MongoDB
AI/ML: RAG, LLMs, LangGraph, ChromaDB, Sentence Transformers
Tools & Version Control: Git, GitHub, VS Code, Postman, Capilot, Cursor
Software Engineering: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS,Operating Systems, Machine Learning, Computer Networks

EXPERIENCE

Python and Web Developer Intern — Feb 2026 – May 2026

Contriver, Bengaluru

- Analyzed and transformed structured datasets using Python, Pandas, and NumPy, performing data cleaning, preprocessing, exploratory data analysis (EDA), and feature engineering to identify trends and patterns.
- Designed interactive analytics dashboards using Streamlit and Plotly to visualize sales performance, customer behavior, KPIs, and business trends, enabling data-driven insights.
- Built and analyzed projects including a Sales Analytics & Forecasting Dashboard and Customer Churn Analysis using Python, Pandas, NumPy, Scikit-learn, Streamlit, and Plotly, evaluating trends and presenting actionable insights through interactive visualizations.

PROJECTS

AI-Powered Sales Analytics & Forecasting Dashboard — **June 2026**
[*Python, Pandas, NumPy, Scikit-learn, TensorFlow/Keras, Streamlit, Plotly, LSTM*]
https://github.com/varunib/AI-Powered-Sales-Analytics-Forecasting-Dashboard

- Developed an interactive sales analytics dashboard using Python, Pandas, NumPy, and Streamlit to perform data preprocessing, time-series analysis, and visualization of weekly sales across 45 stores and departments.
- Implemented an LSTM-based time-series forecasting model with TensorFlow/Keras, MinMax scaling, and sequence-based learning to generate multi-week sales forecasts and evaluate predictions using MAPE and RMSE.

Customer Churn Prediction [*Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, SQL, Jupyter Notebook*] **May 2026**

- Built a customer churn prediction model using Python, Pandas, NumPy, and Scikit-learn, applying data preprocessing, exploratory data analysis (feature engineering, and classification algorithms to identify customers at risk of churn.
- Evaluated and compared classification models using Accuracy, Precision, Recall, F1-score, and ROC-AUC, identifying key customer attributes associated with churn and supporting data-driven retention decisions. workflows.

Credit Card Fraud Detection [*Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn*] **April 2026**

- Developed a machine learning-based credit card fraud detection system using Python, Pandas, NumPy, and Scikit-learn to classify transactions and address challenges associated with highly imbalanced financial datasets.
- Applied techniques including feature preprocessing, class-imbalance handling, and model evaluation using Precision, F1-score.

EDUCATION

- **Visvesvaraya Technological University (VTU), Belagavi** — **2022 - 2026**
  SKSV College of Engineering and Technology, Gadag
  Bachelor of Engineering – Information Science and Engineering — **CGPA: 9.4/10**
- **Smt. SS Pattepur PU College, Belagavi** — **2021 – 2022**
  Pre-University Course (12th Grade) — **Percentage: 82.83%**

CERTIFICATIONS & ACHIEVEMENTS

Completed **Full Stack Developer Internship (Python & ML)** – Contriver, Bengaluru, 2026 Completed
Data Science Internship – Skillhigh, 2025
Completed **Building with the Claude API** – Generative AI and API Development
Secured **1st Rank (4th Semester)** and **2nd Rank (3rd Semester)** in Information Science & Engineering.
